

DANIEL CASTILLO

SOFTWARE ENGINEER

Saint George, UT | dancastlebiz@gmail.com | codecastillo.com | github.com/codecastillo | [LinkedIn](#)

PROFESSIONAL PROFILE

Software engineer who ships and operates products end to end. Designed, deployed, and maintained live web applications on Vercel, Railway, and Supabase, including a social platform with live video, and a permit-data pipeline built on public government APIs. Seven years coordinating construction operations before this, which is where the working habits came from: scope the problem before touching it, name the tradeoff and get it shipped.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend & Mobile: Next.js, React, Expo

Backend: Node.js

Databases: PostgreSQL, Supabase

Cloud & Deployment: Vercel, Railway, GitHub Actions, Sentry, Cloudflare

Tools & Workflow: Git, GitHub, iTerm, Vim, AI (Claude, Codex)

PROJECTS

PermitMiner, Utah Building-Permit Intelligence Pipeline, Personal Project, 2026

<https://permitminer.com>

- Built and run a paid SaaS (Next.js, Supabase Postgres, Stripe, Vercel) that turns Utah building permits into contractor leads, with Scout, Pro and Outreach subscription tiers and a paying customer base.
- Ingest permits every 12 hours from the state construction registry, EPA stormwater notices and county open-data feeds, match each one to the Utah DOPL contractor registry, and tag every contact with its source and a confidence score. Permits are also classified by funnel stage so pre-permit signals surface before the issued record.
- Built an in-app outreach system and a sales CRM for the team: personalized email with reply routing, opt-out and bounce suppression, a call dialog that logs outcomes, pipeline counts by stage, and per-rep access enforced in the database.

Mello, Events-First Friend-Making Mobile App, Personal Project, 2026

<https://apps.apple.com/us/app/mellomeet>

- iOS app built in React Native and Expo and shipped to the App Store. The product is the real-world event, not the profile: users find a local activity, RSVP, and meet in person, so friendships come from showing up rather than swiping.
- Built the backend on Supabase: 168 version-controlled Postgres migrations, row-level security, and 30 Deno Edge Functions. Access and business rules live in the database, so every client gets the same checks.
- Building a ticketing platform on Stripe Connect: vetted organizers sell tiered tickets in the app and get paid out directly. It covers QR check-in that works offline at the door, secret-location events whose address is revealed only to ticket holders, ticket transfers, and admin tools for refunds, disputes and alerts.

ENTREPRENEURIAL EXPERIENCE

ELM EYEWEAR, ST. GEORGE, UT, 2025 TO PRESENT

FOUNDER

- Building a direct-to-consumer eyewear brand, owning the full Shopify storefront, third-party integrations, and the underlying e-commerce architecture end to end.
- Architecting a three-phase go-to-market system (paid social, Kickstarter pre-launch, Shopify full launch) with cross-platform attribution and analytics tracking.

CASTECA HOMES, ST. GEORGE, UT, MAY 2024 TO PRESENT

FOUNDER

- Manage end-to-end residential construction projects, coordinating across permits, vendors, subcontractors, and clients. Strong real-world parallel to coordinating across teams, dependencies, and deadlines in a software environment.
- Diagnose problems on-site and adjust plans in real time, balancing cost, time, and quality trade-offs to keep projects shipping ahead of schedule with clean documentation and clear stakeholder communication.

WORK EXPERIENCE

D&D PLASTERING, ST. GEORGE, UT, JULY 2018 TO MARCH 2024

OPERATIONS COORDINATOR

- Cut customer complaints by 40% by redesigning intake and follow-up workflows. Applied root-cause analysis and process redesign, the same problem-solving mindset I bring to debugging and system design.
- Coordinated 200+ projects and a team of 10+ field workers across multiple concurrent workstreams, while reducing operating costs by approximately \$12K annually.

EDUCATION

SOFTWARE DEVELOPMENT, 2026

Dixie Technical College, St. George, UT

HIGH SCHOOL DIPLOMA, 2020 | GPA: 3.8

Desert Hills High School, St. George, UT
